

B-1122  
ステンレス製B-122  
鉄製ねじ付管筒(丸ボス・溶接ナット)  
TAPPED TUBES

B-122-51

B-1122-8

B-122-21

## 特徴 Feature

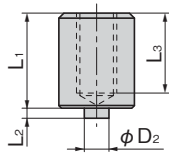

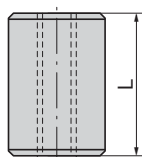

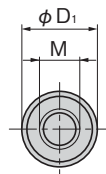

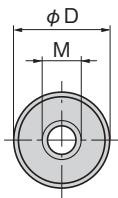

- 用途に応じた大きさが選べます。
- Select the various sizes according to your application

|    |                                                                                                |
|----|------------------------------------------------------------------------------------------------|
| 仕様 | ● 材質:<br>B-1122/ステンレス鋼棒(SUS304相当)<br>B-122/軟鋼線材(SWRM)<br>冷間圧造用炭素鋼線(SWCH)<br>一般構造用圧延鋼材(SS400相当) |
|    | ● 表面仕上: 生地                                                                                     |
| 用途 | ● 配分電盤・制御盤・ローレットつまみの受け                                                                         |
| 納期 | ● 標準在庫品                                                                                        |
| 備考 | ● 他の寸法も製作します。<br>● 角ボスも製作します。                                                                  |

|                |                                                                                                                                                                                                   |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Specifications | ● Material:<br>B-1122: Stainless steel bar (SUS304 equivalent)<br>B-122: Soft steel wire (SWRM)<br>Cold heading carbon steel wire (SWCH)<br>Rolled steel for general structure (SS400 equivalent) |
|                | ● Finish: Plain                                                                                                                                                                                   |
| Specific-use   | ● Power/distribution and control boards and knurl catches                                                                                                                                         |
